

Lactation and Perinatal Mood and Anxiety Disorders

The IABLE Lactation and Perinatal Mood and Anxiety Disorders (PMADs) Conference is designed for individuals who work directly with breastfeeding and lactating dyads. We are more capable of caring for lactating individuals if we have the skills to understand how PMADs affect lactation and vice versa. We anticipate that participants will gain confidence in addressing and screening parents for PMADs, and understanding how lactation care recommendations must accommodate mental health needs.

The Institute for the Advancement of Breastfeeding and Lactation Education
