BREASTFEEDING FOR THE NICU & PICU BEYOND THE BASICS

The NICU/PICU Beyond the Basics is a sequel to the IABLE NICU/PICU Basic of Breastfeeding Support, presented by IABLE in May 2021 ([eCourse version here](#)). Breastfeeding and the provision of human milk for infants in the neonatal or pediatric intensive care units is complex. In the Beyond the Basics series, we will highlight socioeconomic and cultural factors that influence health and medical decision-making among lactating families, such as contraception, mental health, bereavement and congenital diseases. We anticipate that participants will gain a deeper understanding of how we can provide respect, support, and evidence-based breastfeeding and lactation guidance for families whose children are in the NICU/PICU.
