

IABLE Abstract Presentation Day

Friday, August 7th, 2026

8:45am-4:00pm CST

Agenda - Times are CST

Morning Session

8:45-9:00am	Introductions		
9:00-9:30am	Bethany Carvajal MD, IBCLC; Kelly McMullen MD, CLC; Chris Perak RN	Improving Breastfeeding Rates Utilizing Prenatal and Postnatal Partnerships: Making CHAMPS National Work at Denver Health	1. Describe the effect of CHAMPS participation on breastfeeding rates at Denver Health.
9:35-10:05am	Lauren Eastman MD, CCFP, NABBLM-C; Roni Kraut MD, MSc, CCFP; Adria Clark BSc	An Evaluation of YouTube as a Source of Information for Common Breastfeeding Concerns	1. Identify characteristics of breastfeeding videos on YouTube associated with higher-quality content.
10:10-10:40am	Virginia Scheiderer RN, IBCLC; Erin Livingston RN	Human Milk and Breastfeeding in Infants with Single Ventricle Congenital Heart Disease: A Case Series	1. Identify evidence-based practices that support human milk provision and breastfeeding success in congenital heart disease dyads.
10:40-10:55am	Break		
10:55-11:25am	Genevieve Bower RN, MA, IBCLC; Rachel Meadows RN, BSN, IBCLC	Implementing a Protected Period of Exclusive Breastfeeding at Oral Feeding Initiation and Effects on Breastfeeding at Discharge from NICU	1. Describe the effects of implementation of a "Protected Period of Exclusive Breastfeeding" in the NICU on discharge breastfeeding rates.

11:30-12:00pm	Roshanara Diaz Mejia, MD; Kimberly Olivares, MD; Rima Strassman, MD, NABBLM-C, FABM	Lingual Frenotomy for Ankyloglossia with Feeding Difficulty in Bottle Fed Infants: A Case Series	1. Describe post-procedural changes in feeding difficulties in infants with ankyloglossia who underwent frenotomy, with particular emphasis on bottle-fed infants
---------------	---	--	---

12:00pm-1:00pm – Lunch

Afternoon Session

1:00-1:30pm	Elaine Hart MD, ACOG, FABM	Designing Clinically Relevant Research Studies	1. Identify components of a well-designed clinically relevant research study.
1:35-2:05pm	Elizabeth Cannon BC, MS4; Elaine Hart MD, FABM	BABE2: Breastfeeding and Antenatal Breast Milk Expression via Hand Expression Versus Electric Breast Pump: Randomized Control Trial	1. Compare breastfeeding effectiveness between two methods of antenatal breast expression.
2:10-2:40pm	Kimberly Ajalat BS, MS4; Lucy Chang BS, MS4; Elaine Hart MD, FABM	EMBRACE: Empowering Mothers for Breastfeeding Retention and Counseling on Exclusivity	1. Describe a model for medical student education to improve lactation competency. 2. Discuss the impact of medical student lactation education on the rate of exclusive breastfeeding at six weeks postpartum.
2:40-2:55pm	Break		
2:55-3:25pm	Emma Shipton RM, IBCLC	Breastfeeding Outcomes in Midwife-led Continuity and Standard Care: A Quasi-Experimental Study	1. Discuss gaps in the provision of antenatal breastfeeding education across models of care
3:30-4:00pm	Mina Ognjanovic MHA, IBCLC	Ethical Informatics in the Era of Transparency: Using AI to Advance Privacy, Language Access, and Documentation Equity in Newborn and Maternal Care	1. Identify lactation documentation practices that created unintended maternal privacy risks within newborn and infant charts.
